

A Module for Every Mission

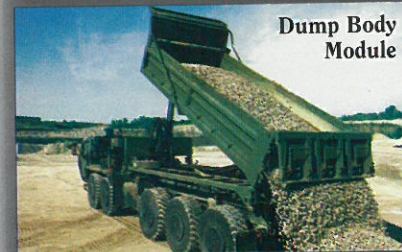

Bituminous Distributor Module

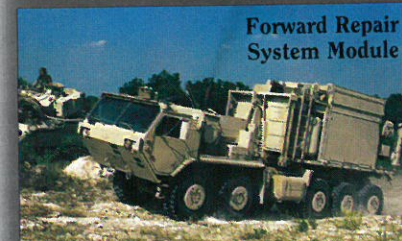

One-person PLS operation speeds delivery of mission modules.

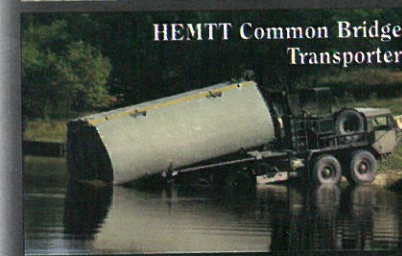

On-Site Fuel or Potable Water

Dump Body Module

Forward Repair System Module

HEMTT Common Bridge Transporter

Modular Fuel

The Oshkosh family of Palletized Load Systems (PLS) makes it possible to use single common vehicles to support many mission requirements.

The PLS permits rapid delivery and distribution of fuel or drinking (potable) water modules. That same PLS vehicle can transport and support the use of Engineer Mission Modules such as water spreaders, bituminous distributors, dump bodies, and mobile concrete mixers. The PLS is also the transport platform for the new Forward Repair System.

The HEMTT-based Common Bridge Transporter (CBT) uses the same PLS system to transport bridging materials for the new Multi-Role Bridge component.

With its ability to transverse rugged terrain, the PLS supports your mission wherever its location. Whether the need is for support of combat, construction or community services during times of natural disaster, Oshkosh PLS is the system of choice for the Army, Army Engineers, and the National Guard.

The Oshkosh Family of PLS

NATIONAL GUARD

Features

18 Missions of the New Millennium

As the National Guard enters its fifth century, NATIONALGUARD magazine looks at three Guard missions set to expand in the years ahead.

A Bigger Piece of Peacekeeping

With the U.S. military busy in operations worldwide, the Pentagon is looking to Army National Guard units and commanders to take over some peacekeeping missions.

Guarding the Final Frontier

The military is already dependent on outer space, and will increasingly rely on its unique capabilities. The National Guard will be there with each little step deeper into the next frontier.

Homeland Defense

The growing proliferation of weapons of mass destruction threatens the United States. Quick-reaction teams are just one step in the fight against this potential scourge.

27 Guard Century

In the last two decades of the 21st Century, the Guard was a homeland defender, regional warrior and international peacekeeper. The fifth and final installment of NATIONAL GUARD magazine's "Guard Century" closes at the dawn of a new era.

36 Industry Day '99

The third-annual NGAUS Industry Day focused on Guard equipment needs. Nearly 300 people attended the presentation featuring speakers from the NGAUS, the National Guard Bureau and the defense industry.
