MOBILIZATION TRAINING AT ANNUAL TRAINING

A second reason why the active Army and Air Force commanders are taking additional interest in Guard readiness is that their units are dependent on Guard units to go to war. In the Federal Guard, support is equal to that provided by the Regulars. Thus, mobilization readiness must be considered in two areas: the Army and the Air Force. The Army and Air Guard are the major force in national defense and mobilization readiness is crucial.

What should commanders, particularly Army and Air Force commanders at the battalion and division level, do to mobilize their units? One thing all commanders can do is build more mobilization factors into their training. One way to do this is to use the training field as an annual training field. The training field is an excellent laboratory for testing the readiness of the unit. The training field is a laboratory for testing the readiness of the unit.

What should commanders do to train their units? One thing all commanders can do is build more mobilization factors into their training. One way to do this is to use the training field as an annual training field. The training field is an excellent laboratory for testing the readiness of the unit. The training field is a laboratory for testing the readiness of the unit.
